

SAURA LED is a solar beacon for outdoor lighting. This luminaire has a PIR motion sensor that regulates the intensity of light depending on the presence of people around. To turn it on or off, simply press its button for 3 seconds until the blue indicator turns on or off. It is a perfect lamp to illuminate passage areas at the entrance of homes or in the garden, because it regulates only the light level according to the presence of people in movement. During the day it stays off in charging mode; at night it projects a dim light until it detects someone around, at which point it emits the total of its light. It can be installed as a beacon or as a stake .

General characteristics

Fixation	Floor
Type	III
IP	54
Switch type	Touch
included battery	. 2,5h
Power	2W

Material

Body/Structure	Aluminium
Diffuser	PC

Finish

Body/Structure	Dark Grey
Diffuser	Opal

Lighting characteristics

Light source included	Yes
Temperature	3000K
LM	225lm
CRI	>80
Degrees of light aperture	180°
Light direction	Ambient lighting
Energy classification	D

Driver

Requires Driver	Yes
Driver embedded	Yes
